

LMU Research Fellowships

Excellent Support for Outstanding Postdocs

The LMU Research Fellowships support the career development of outstanding postdocs from all fields of research. You will benefit from:

- a **two-year fellowship** with a competitive salary and substantial research budget
- managing your **own research project** with the support of an LMU professor
- undertaking **research stays** at international partner organizations
- an **excellent infrastructure** and a wide variety of professional training options
- the vibrant **interdisciplinary exchange** at the Young Center of [LMU's Center for Advanced Studies](#)

Get inspired!

Chemist [Henry Schurkus](#) is the first Outgoing LMU Fellow. With an LMU Research Fellowship in his bag, he will work at the California Institute of Technology in Pasadena. His project could help to make hydrogen production more carbon neutral.

Art historian [Philippe Cordez](#) teases out the hidden connotations of objects that have come down to us from pre-modern times. He joined LMU as a Research Fellow, and now leads a Junior Research Group financed by the Elite Network of Bavaria.

Sign up for our [Workshop!](#)

Learn more about the program, the selection procedure, and all the benefits of our fellowships at our workshop for interested applicants on **18 September 2019** in Munich. [Register here!](#)

Call for Applications now open

We will award **ten Incoming** and **five Outgoing** LMU Research Fellowships to outstanding early career researchers from all fields of research. Applications can be submitted online at any time until closing date on **12 November 2019**.

The Fellowship term must commence between July and September 2020.
