LUISS

The 6th edition of the international conference "New Frontiers in Banking and Capital Markets" will focus on **bank regulation, capital, and corporate governance, exploring these traditional topics within the context of an ever-evolving financial landscape**. The conference will address several key topics at the intersection of traditional banking principles and emerging challenges in the financial sector.

The conference will stimulate research questions with direct policy implications, showcase cutting-edge research in banking and finance, and explore how traditional banking and finance concepts are evolving in response to new challenges and opportunities.

The specific goal of this conference is to identify those areas of policy concern that have been neglected and could be addressed by researchers and policymakers, and how those kinds of information are perceived by stakeholders and investors.

The conference is aimed at providing a setting where academics and practitioners, especially regulators and supervisors can exchange views and discuss emerging issues addressed in top academic research.

Through these interconnected themes, the conference aims to provide a comprehensive exploration of how fundamental banking concepts are being reshaped by technological innovation, changing market dynamics, and evolving societal expectations. By bringing together regulators, academics, and industry practitioners, the event will facilitate in-depth analyses of recent developments, emerging techniques, and innovative approaches in banking and finance.

The discussions will be underpinned by rigorous academic research, practical industry insights, and forward-thinking policy perspectives. Participants can expect a thorough examination of how traditional banking principles are being applied and adapted in the context of new frontiers, contributing to the ongoing dialogue on maintaining financial stability, fostering innovation, and ensuring the resilience of the global banking system in an era of rapid change.

We welcome research, both theoretical and empirical, in all aspects of Banking and Capital Markets, including but not limited to the following topics:

- The evolution of bank regulation
- Corporate governance challenges
- Capital adequacy and liquidity management in times of economic uncertainty
- Financial and non-bank financial intermediation and stability
- The impact of artificial intelligence and machine learning on risk management and compliance
- Sustainable finance and its implications for traditional banking models
- Natural catastrophes and insurance

Blind Review: Please ensure that author names and affiliations are removed from the manuscript. Review Process: All submissions will undergo a rigorous peer-review process. Authors will be notified of acceptance/rejection by November 1, 2024.

Submission: You are invited to submit your paper to newfrontiersbcm.conference@gmail.com

Deadline: October 15, 2024

We look forward to receiving your valuable contributions and welcoming you to the Conference!
